

## AberDance

### Medium leaf

AberDance is bred from winter hardy material to provide flexibility in response to various grazing managements. It offers high yields and shows good survival in systems ranging from continuous sheep grazing through to rotational sheep and cattle grazing.

- Flexible - suitable for hard grazing and cutting.
- High-yielding and persistent in a range of grazing systems.
- Showed excellent persistence over eight years in a UK trial<sup>10</sup>.

## AberNormous

### Large leaf

A new generation, high yielding white clover. AberNormous has dense stolon growth for greater persistency and offers the versatility of being suitable for rotational dairy and cattle grazing, and high production silage pastures.

- Flexible - suitable for hard grazing and cutting
- Versatile - suitable for rotational grazing and cutting
- Retains high digestibility throughout the season
- Bred for greater persistency and forms dense stolon growth
- Good stress and grazing tolerance; pest and disease resistant
- Produces an ideal clover balance for dairy and cattle systems when mixed with AberDance
